

Apply Coalition with Scoir The Latest Updates

Let's Build!

Now that May 1 is behind us, it's time to start thinking about next year's applicants. 😊 If you haven't yet renewed, take a minute to [complete this form](#) and let us know that you'll continue receiving applications from Scoir in year 2.

Once you do, you're ready to go! Our [Apply Set Up page](#) includes what you need to get started, including a recommended build timeline and helpful resources.

Read on to learn more about changes to App Rounds and simpler Application Configuration that will impact your work.

[Begin Building](#)

What's New

App Rounds are open (and easier to maintain)!

Now, you'll separately set requirements and deadlines, including indicating the deadline type (Early Decision, Regular Decision, etc.). Please configure your App Rounds no later than July 31, 2023.

[Set App Rounds](#)

Simpler Application Configuration

We also updated the way you'll configure the information you receive from applicants via Scoir. Excitingly, we expanded fee waiver criteria, which allows you to better reach the students who need help the most. Did you know that in year 1 of this new application experience, 45% of students who applied with Scoir were fee waiver eligible?

Events

How to Set Up Apply with Scoir

Psst don't forget, we're hosting configuration sessions for colleges that use Slate, and those that don't (Scoir Managed). We'd love to see you there!

Scoir Builds

Application Profile Specification v2.1

There's a new [Application Profile Specification](#) now available!

You can find this linked on the [Application > Configuration](#) page in Scoir, as well as on the [Apply Set Up page](#).

And Coming Soon

An even better application experience for students

Did you join us for Access & the Application a few weeks back? If not, be sure to watch the replay to better understand the changes coming to the student experience in year 2.
