

Hi there,

We're working closely with Technolutions to finalize the Slate changes that will support final configuration steps and activation of your application.

We recognize this timing isn't ideal. Please rest assured that we'll do everything in our power to get you across the finish line. As soon as Technolutions pushes their updates, we'll share out detailed instructions to complete your set up. Once available, we also plan to host daily Office Hours at 2pm et.

What happens if we can't activate before August 1?

If your college is unable to activate on or before August 1, students can still begin their applications to your institution. They just won't be able to initiate step two. Once you activate, we'll notify those students with in-progress applications that they can initiate and continue to your supplement to complete the second step before submitting.

What can we do in the meantime?

As a reminder, please ensure you've done the following in Scoir, and in Slate, ahead of August 1.

In Scoir

- Set your [Application Rounds](#) in Scoir (including deadlines and document requirements...[help](#) if you need it)
- [Configure your application](#) in Scoir ([watch how](#)) and test it (either by your Application Manager, or those with the Application Tester role)

In Slate

- **Returning partners may now prepare next cycle's supplement by** editing your existing supplement, or copying your existing supplement into a new form
- **New partners may now prepare next cycle's supplement by** creating a new application-scoped form (available immediately) or waiting for the finalized Coalition Application Supplement Form (pending release from Technolutions)

Please find more information, detailed recommendations, and next steps [here](#).

Finally, we recommend reviewing our [Launch Planner](#), which includes helpful copy you can use on your website and anywhere your application link will appear.

If you have any questions, reply to reach our team. We're happy to help.

All the best,

Megan
