

# Considering Scoir?

Learn why 2,000+ high schools have already made the switch!

## Dedicated support

99% of support tickets are resolved in less than 24 hours

We are really enjoying Scoir so far—especially the part where I ask a question and an actual human responds, haha! The customer service alone would have been enough to switch from another platform.

**Evelyn Cohen**

*Watkinson School, CT*

## Time-saving software

Features specifically designed to save hours and energy

I just uploaded my first test data file to Scoir. What would sometimes take me an hour to do in our other system took less than a minute. And, Scoir's drag and drop data entry is awesome!

I am so glad we made this move!

**Cyndi Choate**

*Counselor, Lutheran South Academy, TX*

## Student-centered design

Reduce the learning curve and increase adoption

I've introduced Scoir to our seniors, and enjoyed hearing students appreciate how much more user friendly the product is... Students notice and are excited!

**Anne Aguirre**

*Notre Dame High School*

# How Scoir compares to the alternatives

Our mission is to ensure you have what you need to make an informed decision.

# The Scoir Difference

Here are just a few ways we stand out above the competition

01

## Your domestic solution for career and college readiness

While Scoir supports the international market, we're headquartered in the United States (Cialfo is headquartered in Singapore) and we specialize in high schools, districts, colleges, and universities in the United States. As students explore best-fit careers and colleges, know that we're tuned into the latest policies that affect college applications, financial aid changes, modern careers, and more.

02

## College & Career Readiness Curriculums

Included free with every Scoir account are comprehensive [50+ ASCA-compliant college readiness lesson plans](#) for grades 9-12, and a [Career Readiness Curriculum for grades 6-12](#)! These curriculums contain detailed lesson plans and activities covering topics from career exploration to financial literacy. Lessons build as students grow and everything is mapped out in advance for you!

03

## Features built with you in mind

On top of using features that counselors love like the ability to resend docs and upload letters of recommendation on behalf of others, you'll also access features like creating custom properties which are fields that you create allowing you to store, view, filter, and export unique information about your students and school in Scoir. Plus, create Tasks to help keep everyone on track!

04

## PrinciplesYou Character Assessment

[PrinciplesYou](#) is a scientifically-validated character assessment that engages Gen Z in self-discovery, and it's included with Scoir! PrinciplesYou is designed to tap into character traits and measures them across three orientations: Cognitive, Interpersonal, and Motivational. The assessment can be taken in one class period, and students receive a detailed report and get matched with best-fit careers based on their results.
